

INTRODUCING...

CIRRUS AUSTRALIA

Cirrus Australia specialises in the delivery, implementation and support of IBM software and services. We are one of only a handful of Australian companies certified across all five IBM Software Brands.

What can we do for you?

Cirrus Australia will leverage your current IT investment and provide you with a customised and efficient solution using current and emerging IBM technology. The result will deliver real value to your business by enabling your staff to work smarter and faster. Furthermore, results are realised immediately with measurable ROI and a strong competitive advantage.

Why choose us?

- Our staff is among the best. Each staff member is hand picked for their knowledge and skill level in IBM technology. They are considered among the best in Australia.
- To date*, we have a 100% success rate in project implementation (on time, within budget and covering required specifications). *March 2009
- You'll get a total solution. Cirrus Australia custom designs and effectively configures a software solution that will be an exact fit to your needs and budget.
- Cirrus Australia people talk with you, not at you. From project inception through to practical implementation, we will listen to your needs and collaborate with you to ensure a solution is delivered which most closely aligns with your strategy, vision and budget.

Information Management

Tivoli.

Lotus.

WebSphere.

Rational.
